Abstract

Iroduction

Title of the project

Bike-Share Usage in London and Taipei Network Analysis

Information of team members

Member 1: Mulin Wan

Member 2: Jingwen Yao

Member 3: Yunze Guo

Member 4: Boyang Wang

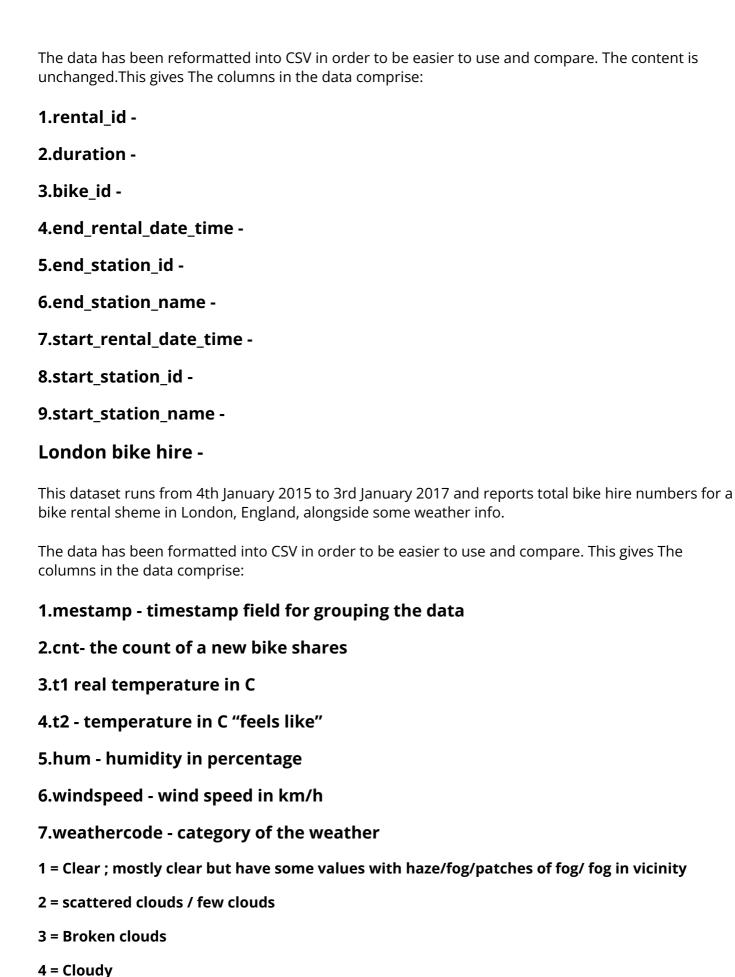

Description

Dataset:

For this project, we are going to combine the data from two datasets. One of the two datasets is bike-share usage in London and Taipei, the other is London bike hire.

Bike-Share usage in London and Taipei

The raw data is collected from the respective cities open data sites. London Taipei

7 = Rain/ light Rain shower/ Light rain

10 = rain with thunderstorm

26 = snowfall

8.isholiday - boolean field - 1 holiday / 0 non holiday - refers to bank holidays

9.isweekend - boolean field - 1 if the day is weekend / 0 if a working day

10.season - category (0-spring; 1-summer; 2-autumn; 3-winter)

In addition to season and isweekend, from the tiestamp feature we can extract many separate time features - day of the week (as one scaled column or as seven columns of ismonday, istuesday etc.), month number, day of the month, week number, hour, minute. In combination with external data, we could add islight for after dawn times and is schoolholiday to match London school holiday times.

London and Taipei bikeshare

London bikeshare

Proposal

Bike-sharing in a city has in recent years become a key part of urban transport of humans. The data is spatiotemporal, that is, it varies over space and time. That variation can be explored, described and modelled in many different ways. The two cities contained in this data set are London and Taipei, both very large cities with very large bike-share systems. There is variation within the two cities, as well as between them.

Previous work has also shown that weather is a key driver for variation is usage. We'd like to use those datasets to analysis the evidence for extreme weather events, like typhoons in Taipei or winter rain in London and the locations for retal and end-trip, in order to distinguish weather condition and those locations in city area affact citizens' bike retal behavior.

This manuscript is a template (aka "rootstock") for <u>Manubot</u>, a tool for writing scholarly manuscripts. Use this template as a starting point for your manuscript.

The rest of this document is a full list of formatting elements/features supported by Manubot. Compare the input (.md files in the /content directory) to the output you see below.

Basic formatting

basic formatting

subscript: H₂O is a liquid

superscript: 2¹⁰ is 1024.

unicode superscripts⁰¹²³⁴⁵⁶⁷⁸⁹

unicode subscripts₀₁₂₃₄₅₆₇₈₉

A long paragraph of text. Lorem ipsum dolor sit amet, consectetur adipiscing elit, sed do eiusmod tempor incididunt ut labore et dolore magna aliqua. Ut enim ad minim veniam, quis nostrud exercitation ullamco laboris nisi ut aliquip ex ea commodo consequat. Duis aute irure dolor in reprehenderit in voluptate velit esse cillum dolore eu fugiat nulla pariatur. Excepteur sint occaecat cupidatat non proident, sunt in culpa qui officia deserunt mollit anim id est laborum.

Putting each sentence on its own line has numerous benefits with regard to <u>editing</u> and <u>version</u> <u>control</u>.

Line break without starting a new paragraph by putting two spaces at end of line.

Document organization

Document section headings:

Heading 1

Heading 2

Heading 3

Heading 4

Heading 5

Heading 6

Horizontal rule:

Heading 1's are recommended to be reserved for the title of the manuscript.

Heading 2's are recommended for broad sections such as Abstract, Methods, Conclusion, etc.

Heading 3's and Heading 4's are recommended for sub-sections.

Quotes and code

Quoted text

Quoted block of text

Two roads diverged in a wood, and I—I took the one less traveled by, And that has made all the difference.

Code in the middle of normal text, aka inline code.

Code block with Python syntax highlighting:

```
from manubot.cite.doi import expand_short_doi

def test_expand_short_doi():
    doi = expand_short_doi("10/c3bp")
    # a string too long to fit within page:
    assert doi == "10.25313/2524-2695-2018-3-vliyanie-enhansera-copia-i-
        insulyatora-gypsy-na-sintez-ernk-modifikatsii-hromatina-i-
        svyazyvanie-insulyatornyh-belkov-vtransfetsirovannyh-geneticheskih-
        konstruktsiyah"
```

Code block with no syntax highlighting:

```
Exporting HTML manuscript
Exporting DOCX manuscript
Exporting PDF manuscript
```

Figures

Figure 1: A square image at actual size and with a bottom caption. Loaded from the latest version of image on GitHub.

Figure 2: An image too wide to fit within page at full size. Loaded from a specific (hashed) version of the image on GitHub.

Figure 3: A tall image with a specified height. Loaded from a specific (hashed) version of the image on GitHub.

Figure 4: A vector .svg image loaded from GitHub. The parameter sanitize=true is necessary to properly load SVGs hosted via GitHub URLs. White background specified to serve as a backdrop for transparent sections of the image.

Tables

Table 1: A table with a top caption and specified relative column widths.

Bowling Scores	Jane	John	Alice	Bob
Game 1	150	187	210	105
Game 2	98	202	197	102
Game 3	123	180	238	134

Table 2: A table too wide to fit within page.

	Digits 1-33	Digits 34-66	Digits 67-99	Ref.
pi	3.14159265358979323 846264338327950	28841971693993751 0582097494459230	78164062862089986 2803482534211706	piday.org
